

COLLEGE OF ARTS AND SCIENCES

The College of Arts and Sciences (CoAS) is among Drexel's most diverse academic colleges. With graduate programs spanning the humanities, social sciences, and natural sciences, including nine doctoral offerings, the college is a leader in the University's commitment to multidisciplinary learning. Every corner of Drexel can be tied directly to one or more of the college's departments or centers. CoAS serves as the intellectual and research home to the University's greatest strengths in health, technology, and the environment.

CoAS faculty are at the forefront of a wide range of fields and emphasize experiential learning to prepare students for competitive placement in a variety of careers aimed at addressing the problems of the 21st century. With a focus on new and emerging technologies, these faculty encourage a culture of collaboration across disciplines, which enhances the already robust research profile of the college and university. From clinical psychology to environmental policy, faculty in the college are internationally recognized in their fields, garnering grants from the National Institutes of Health, the National Science Foundation, NASA, and other prestigious institutions. CoAS students often collaborate on faculty research projects, but also initiate their own, contributing solutions to society's greatest challenges.

Through interdisciplinary academics, hands-on experience, and faculty mentorship, graduates of the College of Arts and Sciences rise to the top of their fields, putting theory into practice to confront real-world issues. The next generation of leadership begins here.
