COLLEGE OF ENGINEERING

The rapid advances and evolving challenges in our world necessitate engineers who can think broadly, adjust quickly, and act decisively. As the flagship college of the University, the College of Engineering is empowering students to engineer change — in their lives and through their careers — by emphasizing a balance of theory and practical experience.

As a comprehensive, global institution, classes are taught by academic and industry experts. The programs provide options to customize study and include a graduate co-op in addition to the relevant curricula, grounded in foundational principles and practices while providing opportunities to explore emerging topics in various engineering disciplines.

Master's and certificate programs offer an education that propels careers forward as students become experts in the field and doctoral programs provide the opportunity to learn alongside world-renowned faculty pursuing theoretical and applied research at an R1-designated institution. Graduate students from Drexel Engineering graduate equipped with the tools to advance in the profession and follow a trajectory toward making an impact. The next generation of leadership begins here.
